EDUCATION

University of Western Ontario

September 2022 - Present

Candidate for BSc in Honours Specialization Computer Science

London, ON

- **Relevant Courses:** Data Structures and Algorithms, Operating Systems, Artificial Intelligence, Databases, Software Engineering, Computer Organization & Architect, Software Tools & Systems Programming.

SKILLS

Languages: Python, SQL, Java, C, JavaScript, HTML, CSS, PHP.

Framework/Tools: Microsoft Office, Pandas, Java Swing, Vite, ReactJS, Linux/Unix, Git, Bash, UML.

Soft Skills: Quick Learner, Team Collaboration, Problem-Solving, Communication, Adaptability.

PROJECTS

Healthcare Database Management System — *HTML, MySQL, Javascript, CSS, Unix, PHP*

- Designed a relational database for disorganized medical records, optimizing data management with SQL queries.
- Implemented CRUD functionality for efficient data retrieval and navigation.
- Streamlined integration of 30+ patient records into a centralized database for efficient data organization.

Espn API Stat Tracker — *Python, Git, Pandas, Microsoft Office*

- Leveraged Git to manage large-scale player data, ensuring effective version control and collaboration.
- Automated extraction and integration of player stats for 1,000+ athletes into Excel files using Python.
- Utilized Pandas to efficiently process, analyze, and export over 100,000 data points, enabling rapid insights and player performance tracking in under 2 minutes.

Virtual Pet Simulator — *Java, JavaSwing, Git, UML, Unix*

- Collaborated with a team to develop an educational Java-based game with user-friendly interactions.
- Led the design and development of the project using UML and JavaSwing for GUI.
- Used Git for version control to improve collaboration, streamline code integration, and speed up development.

Maze Solver — *Java*

- Developed a Java maze-solving program using DFS to find optimal paths in mazes with up to 100 rooms.
- Designed a system to manage coin-based doors and ensure scalability with minimal time complexity.
- Utilized object-oriented programming (OOP) principles to model the maze, rooms, doors, and player interactions, enhancing code modularity and maintainability.

WORK EXPERIENCE

HxV Digital Media

July 2024 - August 2024

IT Specialist

Toronto, ON

- Diagnosed issues, optimized workstations, and automated tasks with PowerShell, reducing workload by 30%.
- Designed and optimized PC workstations, managing budget constraints while maximizing performance, longevity, and scalability for diverse client needs.
- Diagnosed and resolved 100+ complex network, hardware, and software issues, implementing cost-effective solutions that minimized downtime and improved system reliability.

People's Christian Academy

May 2024 - August 2024

Early Learning Centre Assistant

Markham, ON

- Organized activities and supported routines for children aged 2-4, fostering safety and teamwork.
- Communicated effectively with parents and staff to ensure alignment on each child's progress and well-being.
- Ensured a clean, organized daycare environment, adhering to health and safety guidelines.
